

SALARY TRANSFORMATION SYSTEM

SUBJECT : PST

Name : Narendar M

VTU : 28192

TASK 1

QUESTION

Task 1 (Easy): Salary Transformation System

Problem Description

A company stores employee salaries in a list. Increase each salary by 10% and print the updated salaries using functional transformation techniques.

Input Format

- First line contains integer N.
- Second line contains N space-separated integers.

Output Format

Print updated salaries.

Constraints

- $1 \leq N \leq 10^5$

Sample Input

```
5
1000 2000 3000 4000 5000
```

Sample Output

```
1100 2200 3300 4400 5500
```

PROGRAM

```
import java.util.*; import
java.util.stream.*;
public class Main
{
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);

        int n = sc.nextInt();
        List<Integer> salaries = new ArrayList<>();
        for (int i = 0; i < n; i++) {
            salaries.add(sc.nextInt());
        }
        salaries.stream()
```

```
        .map(salary -> salary + salary / 10)
        .forEach(salary -> System.out.print(salary + " "));

sc.close();
    }
}
```

OUTPUT :

```
Command Prompt

C:\Users\Lenovo\Desktop\JavaCode>javac Main.java

C:\Users\Lenovo\Desktop\JavaCode>java Main
5
1000 2000 3000 4000 5000
1100 2200 3300 4400 5500
